SUMMARY

Computer Science graduate with a **9.2/10 CGPA** and hands-on experience in **AI/ML, NLP, LLMs, and multi-agent systems**. Currently an **AI Core Model Engineering Intern at Centific**, developing agentic workflows for software governance, privacy, documentation, and human oversight. Strong in Python, Java, transformer-based NLP, LLM applications, RAG, prompt engineering, and backend development.

EXPERIENCE

Centific — AI Core Model Engineering Intern (Jun 2026 – Present) Hyderabad, India

- Contributing to **Governance-360**, a multi-agent AI system that audits software projects across privacy, security, compliance, AI safety, reliability, and other governance areas using evidence-backed analysis.
- Engineered three specialized agents: **WARDEN** for privacy and personal-data lifecycle checks, **SCRIBE** for documentation and EU AI Act Annex IV requirements, and **OVERSEER** for human oversight and safe-fallback validation.
- Built agent workflows that analyze source code, configuration, and documentation to generate structured governance findings with traceable evidence for independent verification.
- Worked on an **evidence-first agent architecture**, integrating tool-based checks with LLM reasoning to produce reproducible and auditable assessment results.

EDUCATION

Keshav Memorial Institute of Technology Hyderabad, India
B.Tech in Computer Science — CGPA: 9.2/10 2022 – 2026

Sri Chaitanya Junior College Hyderabad, India
Telangana Board of Intermediate Education — 99% 2020 – 2022

TECHNICAL SKILLS

Programming: Python, Java, C, C++, JavaScript

Backend: FastAPI, Flask, REST APIs, JSON Schema

AI/ML: Machine Learning, NLP, Transformers, BERT, LLMs, AI Agents, Prompt Engineering, RAG

Frameworks: LangChain, Hugging Face Transformers, Scikit-learn

Databases: MySQL, MongoDB, Astra DB

Frontend: ReactJS, Streamlit

Tools: Git, GitHub, Docker, AWS

Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

PROJECTS

NutriCoach — Multi-Agent AI Nutrition Analysis System GitHub | Publication

- Built a multi-agent nutrition platform using **Python, FastAPI, React, Groq LLaMA 3.1, Astra DB, and RAG**, coordinating specialized agents for nutrition analysis, recommendations, coaching, and knowledge retrieval.

Named Entity Recognition Pipeline — Python, FastAPI, Transformers, BERT GitHub

- Built a transformer-based NLP pipeline for entity extraction using **BERT** and Hugging Face Transformers, exposed through structured FastAPI endpoints.

Syllabus Alignment Verification System — Python, Flask, BERT, ReactJS GitHub

- Developed an NLP system to measure semantic similarity between lecture transcripts and syllabus topics using **BERT embeddings and cosine similarity**.

CERTIFICATIONS

Data Science & Generative AI: Innomatics Research Labs

Full Stack Web Development (MERN): Udemy

PUBLICATIONS & ACHIEVEMENTS

Publication: “NutriCoach: A Multi-Agent AI Framework for Personalized Nutrition Recommendation Using RAG and LLMs,” *International Journal of Artificial Intelligence & Applications (IJAIAP)*, Vol. 5, Issue 1, 2026, pp. 31–41. DOI

Centific Premiere Hackathon 2.0: Selected among **70 from 200 hackathon participants**, after **13,000+ applicants**, in a 7-day competitive hackathon, earning an AI Core Model Engineering Internship offer at Centific.

NSTSE: All India Rank 191, AP State Rank 49.

Academic: Maintained 9.2 CGPA across all semesters, placing in the top 5% of the Computer Science department at KMIT.
